

# Trimble Navigation, transforming the way the world works

*Presentation, Tuesday, January 5th, 11:30 am, Room E4 – LUNCH WILL BE PROVIDED*

Trimble is an exciting, entrepreneurial company, with a history of growth coupled with a disciplined and strategic focus on being the **best**. While GPS is at our core, we have grown beyond this technology to embrace other sophisticated technologies and solutions, in doing so; we are changing the way the world works. Our solutions are used in over 140 countries and we have incredibly diverse lines of business.

Our employees, including UNB graduates, represent this diversity and can be found in over 30 countries, working closely with their colleagues around the world. Due to our geographic, product and customer reach, there is plenty of room at Trimble for exceptional people to grow. Come position yourself with an innovative industry leader and position yourself for success.

Currently recruiting for our full-time, **Rotational Development Program/Applications Engineer** and **12 month Internships** both based in Westminster, Colorado. Also taking resumes for future roles.

*Please join us for a presentation about who Trimble is and how we can create a partnership together.*

**Interviews will be held on Tuesday, January 5<sup>th</sup> and Wednesday, January 6<sup>th</sup>. Please send resumes in advance to [jarrett\\_fraser@trimble.com](mailto:jarrett_fraser@trimble.com).**
